Aroma read

Dark, hoppy earth and cracked pepper over a diesel funk, with licorice and soft magnolia resin.

Read the full sensory story +

Jelly Breath leads with a darker kind of weight: dense myrcene earth, cracked pepper, and a hoppy diesel funk, edged with licorice and a soft magnolia resin.

Myrcene sets the grounded base and caryophyllene builds the spice-and-gas frame; limonene adds a clean lemon cut, while bisabolol, linalool, and the farnesenes turn the finish softer and more perfumed. Gas reads as a supporting note here — an emergent balance, not a single loud terpene.

Sensory architecture

Top	Middle	Base
Hops, lemon peel, magnolia, faint green fruit	Pepper, licorice, resin wood, soft floral	Myrcene earth, hoppy spice, damp herb, dark sweetness

Aroma tags

dark earth · cracked pepper · hoppy gas · licorice · magnolia resin · lemon peel

13 analytes +

Source-reported analytes, including compounds not modeled by the classifier

Analyte	% by mass	mg/g
β-Myrcene	0.64%	6.4
β-Caryophyllene	0.35%	3.5
Anisole	0.27%	2.7
δ-Limonene	0.23%	2.3
α-Humulene	0.16%	1.6
cis-β-Farnesene	0.12%	1.2
β-Pinene	0.12%	1.2
α-Bisabolol	0.10%	1.0
Linalool	0.09%	0.9
α-Farnesene	0.09%	0.9
trans-Phytol	0.06%	0.6
Valencene	0.05%	0.5
Endo-Fenchyl Alcohol	0.04%	0.4

Transcribed in the supplied prototype. Unmodeled analytes such as anisole are shown here but do not affect the compact classifier.
