Aroma read

Lemon oil and lavender up front, green resin and a cool mint-herb lift over a grounded kush finish.

Read the full sensory story +

Kush Mints comes through sharper than the name suggests: lemon oil first, lavender close behind, then green resin and a quiet mint-herb lift cooling through the finish.

Limonene drives the brightness and linalool gives the soft lavender center, while myrcene and caryophyllene hold the kush structure underneath and the farnesenes add a fresh green-resin note. Dense and high-definition — citrus on the inhale, floral resin through the middle, a grounded finish with enough lift to stay alive.

Sensory architecture

Top	Middle	Base
Lemon oil, green apple resin, mint-herb lift	Lavender, citrus rind, soft floral, pepper	Kush earth, myrcene body, resin wood, hoppy spice

Aroma tags

lemon oil · lavender · green resin · mint-herb · kush earth · soft spice

Full reported panel — 17 analytes +

Source-reported analytes, including compounds not modeled by the classifier

Analyte	% by mass	mg/g
δ-Limonene	0.91%	9.1
Linalool	0.50%	5.0
β-Myrcene	0.35%	3.5
β-Caryophyllene	0.28%	2.8
cis-β-Farnesene	0.19%	1.9
β-Pinene	0.14%	1.4
α-Farnesene	0.14%	1.4
Valencene	0.11%	1.1
Endo-Fenchyl Alcohol	0.10%	1.0
α-Terpineol	0.10%	1.0
α-Humulene	0.09%	0.9
Anisole	0.09%	0.9
α-Bisabolol	0.04%	0.4
trans-Nerolidol	0.04%	0.4
Terpinolene	0.03%	0.3
trans-Phytol	0.03%	0.3
Camphene	0.03%	0.3

Transcribed in the supplied prototype. Unmodeled analytes such as anisole are shown here but do not affect the compact classifier.
