Minor & Supporting Terpenes

The quiet ones. Often present, rarely dominant — but they explain why a flower reads the way it does.

MASS ≠ AROMA

β-Farnesene can top a COA by quantity yet barely register to the nose. We weight it low — a big number that doesn't drive the smell shouldn't drive the classification.

GAS IS EMERGENT

No single terpene smells like gas. It appears when caryophyllene, limonene, and myrcene/humulene land in balance.

SUPPORTING · IMPACT + TRACE · 22

β-Farnesene
Fruity / Sweet

Green apple, woody, faint citrus

High-mass but aromatically quiet — can top a COA by quantity yet barely shape the nose.

α-Farnesene
Fruity / Sweet

Green apple skin, woody, citrus

Apple-skin top note found in many modern crosses; subtle even at high concentration.

Camphene
Piney / Fresh

Damp fir, camphor

Cool resinous fir; deepens the piney structure.

Δ-3-Carene
Piney / Fresh

Sweet pine, cedar, lemon

Sweet-resinous; bridges pine and citrus with a cedar finish.

Geraniol
Floral / Soft

Rose, geranium, sweet

Bright rose-floral; potent and instantly recognizable.

Fenchol
Herbal / Woody

Basil, camphor, lemon-earth

Earthy-herbal pivot; common in basil-leaning profiles.

Borneol
Herbal / Woody

Camphor, mint, herbal

Cooling camphor-herb; lends a medicinal-herbal crispness.

Sabinene
Piney / Fresh

Peppery, woody, citrus-spice

Spicy-woody freshness; adds peppery complexity to pine.

Eucalyptol
Herbal / Woody

Eucalyptus, mint, cooling

Cooling lift; primary driver of the Clean / Fresh modifier.

Citronellol
Floral / Soft

Rose, citrus, soft floral

Trace rose-citrus nuance; rounds floral tops.

Nerol
Floral / Soft

Sweet rose, fresh citrus

Trace sweet-floral lift.

Phytol
Herbal / Woody

Balsamic, green, faint floral

Trace green-balsamic; a backdrop note, not a lead.

Isopulegol
Herbal / Woody

Mint, cooling, herbal

Trace minty-cool note; reinforces Clean / Fresh modifier.

Pulegone
Herbal / Woody

Minty, camphor, herbal

Trace mint-camphor; supports cooling character.

Menthol
Herbal / Woody

Cooling mint

Rare cooling trace; strong Clean / Fresh signal when present.

α-Cedrene
Herbal / Woody

Cedar, dry wood

Trace cedar nuance; deepens woody structure.

α-Bergamotene
Spicy / Warm

Warm wood, faint tea

Trace warm-wood spice.

α-Phellandrene
Citrus / Bright

Mint-citrus, peppery

Trace minty-citrus pepper.

γ-Terpinene
Piney / Fresh

Fresh, woody-citrus

Trace fresh-woody lift.

Sabinene Hydrate
Herbal / Woody

Marjoram, fresh herb

Trace fresh-herb nuance.

Geranyl Acetate
Floral / Soft

Rose, sweet fruit, floral ester

Trace sweet-rose ester; lifts floral and candied tops.

α-Terpinene
Piney / Fresh

Fresh citrus, woody-pine

Trace fresh-citrus pine; common alongside terpinolene.

WHAT A PANEL CAN'T SEE

The savory, garlicky funk in some gas strains comes from volatile sulfur compounds, not terpenes — standard COAs don't measure them. Always confirm with your nose.
